

DigiLocker Tutorial

Documents • Online • Estimated time: 10 min

Overview

DigiLocker gives every Aadhaar holder 1 GB of secure cloud storage for official documents. Documents pulled from issuers carry the same legal status as originals under the IT Act.

Eligibility

- Any Indian resident with an Aadhaar number
- Aadhaar-linked mobile number for OTP verification

Required Documents

- Aadhaar number — 12-digit number. Used to create the account.
- Mobile number — SMS OTP. Becomes your DigiLocker username.

Charges & Timeline

Government fee: Free

Service charge: No charge

Processing time: Instant

Payment methods: Not applicable

Step-by-Step Guide

Step 1: Create your account

Open digilocker.gov.in or the mobile app and choose Sign Up. Enter your name, date of birth and mobile number.

Step 2: Verify with Aadhaar

Enter your Aadhaar number and the OTP sent to your linked mobile to complete KYC.

Step 3: Set a six-digit security PIN

This PIN protects your locker in addition to the OTP login.

Tip: Avoid birth years and repeated digits.

Step 4: Pull issued documents

Go to Issued Documents, search for an issuer such as CBSE or the Transport Department and fetch your record.

Note: Issued documents update automatically when the issuer revises them.

Step 5: Share securely

Use the Share option to generate a time-limited link instead of sending copies over messaging apps.

Warning: Never share your DigiLocker OTP or PIN with anyone, including callers claiming to be officials.

Common Mistakes

- Uploading scans to 'Drive' instead of pulling verified issued documents
- Registering with a mobile number you no longer use
- Sharing screenshots instead of secure share links

Frequently Asked Questions

Are DigiLocker documents legally valid?

Yes. Documents issued into DigiLocker are treated at par with original physical documents.

How much storage do I get?

Every account includes 1 GB of free cloud storage for uploaded files.

Official Portal
